

Aoxio update instructions

Important Before applying the update **v 2.1** make sure you are using **v 2.0** (You can check the current version to login your admin panel > footer), If you are using an older version please contact our support codericks.envato@gmail.com to get the previous versions.

Step 1: Download the latest script and extract it on your pc. Open **aoxio_v2.1 > updates > v2.1 > uploads** folder there you will see **2 zip files** inside the **“uploads”** folder now you need to upload these zip files in your server please follow the below directions carefully.

- **application.zip** > upload path: Goto your project **root folder > application** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your project **root folder** upload this zip file and extract it

Step 2: Open the latest downloaded script and upload this **“updates”** folder on your server project root folder and replace.

Step 3: Open a browser and write a url like this: **www.yourdomain.com/updates/v2.0** you will see a page like below here enter your item purchase code for update this script.
